Senior Fullstack Engineer specializing in performant frontend development with a dedication to supporting local communities and social good.

PROFESSIONAL EXPERIENCE

Senior Fullstack Engineer

ShopQuinky.com, Remote

March 2025 - June 2025

- Led greenfield e-commerce platform initialization using TypeScript, React, NextJS, MedusaJS, Tailwind CSS, and ShadCN components
- Established foundational architecture and deployed scalable infrastructure using Docker containerization and Railway platform

Co-Founder

muNode.dev, Philadelphia, PA

January 2020 - March 2025

- Co-founded Web3 gateway platform emphasizing privacy and personal data ownership using TypeScript, React, Docker, and Linux
- Architected blockchain integration supporting Ethereum networks, µDNS for µDomains, Solid Pods data management, and decentralized µApplications

Senior Software Engineer

Fashionphile, Los Angeles, CA

January 2022 - June 2023

- Enhanced user portal workflows for selling items and obtaining quotes using React, Redux, NextJS, Saga state management, and AWS deployment
- Developed responsive interfaces with SCSS/CSS styling and implemented testing strategies using Jasmine, Jest, Storybook, and JIRA collaboration

Senior Software Engineer

Dynepic, Inc., San Francisco, CA

November 2020 - November 2021

- Led engineering of scheduling application using Angular, TypeScript, Material UI, and Bootstrap for job fair and convention demo planning
- Implemented scalable solutions with Docker containerization, Rancher deployment on Google Cloud, and Storybook component library with JIRA project management

Lead Software Engineer

Open Source Medical Supplies, New York, NY

March 2020 - March 2021

- Led development of custom React components for WordPress website, improving UI/UX for 74,000+ volunteer network across five time zones

- Managed global collaboration integrating feedback from medical professionals and fabricators using Material UI, CSS/SCSS, Google Cloud, Airtable, and Figma

User Interface Engineer

Federal Reserve Bank of New York, New York, NY

January 2020 - December 2020

- Led UI modernization of internal websites using Angular, TypeScript, Bootstrap, Material UI, and jQuery with responsive design implementation
- Partnered with stakeholders to gather requirements, translate insights into wireframes using InVision, and deliver brand-consistent designs through JIRA with CSS/LESS styling

Software Engineer

ADP, New York, NY

June 2019 - January 2020

- Maintained and enhanced payroll and time/clock systems using Angular, TypeScript, and jQuery serving thousands of users across 350,000+ lines of code
- Improved system reliability and compliance through rigorous testing using Jasmine, Jest, ShallowRender, and JIRA workflow management with CSS styling

VOLUNTEER EXPERIENCE
